**July 27, 2025**

**Dear Hiring Manager,**

**I am writing to express my interest in the Senior Software Engineer position at your organization. With over 2 years of experience in backend development, distributed systems, and production-grade microservices, I am excited by the opportunity to contribute to a product delivery team focused on innovation, performance, and scalability.**

**In my current role at Go Digit Life Insurance, I have designed and delivered resilient microservices using Java, Spring Boot, and PostgreSQL, supporting high availability and low-latency requirements. I also developed a Kafka-based event processing pipeline that handles over 500K messages/day with 99.9% reliability. I actively monitor system health using Prometheus and Grafana, and implemented automated runbooks and alerting workflows, reducing incident resolution time by 60%.**

**Beyond backend expertise, I've worked on building and maintaining frontend components using Angular, with a focus on usability and performance. My experience with OAuth 2.0 and secure authentication flows ensures that I can develop robust, user-safe systems end to end.**

**I've also led sprint planning, conducted detailed code reviews, and mentored junior engineers to uphold engineering best practices. My ability to identify technical debt, propose improvement strategies, and take ownership of production issues aligns well with your team's goals. In addition, I have experience containerizing applications with Docker and deploying services in Kubernetes environments, further enabling scalability and reliability.**

**What draws me most to this opportunity is the balance between technical ownership and team collaboration—contributing to architectural discussions, refining implementation details, and delivering secure, high-performance features.**

**I would welcome the chance to contribute to your mission-driven engineering culture and bring in my skills to improve product delivery and operational excellence. Thank you for considering my application. I look forward to the opportunity to speak with you further.**

**Sincerely,**

**Rohit Kumar**
