

GitHub Copilot Login Documentation

1. Accepting the Copilot Invitation

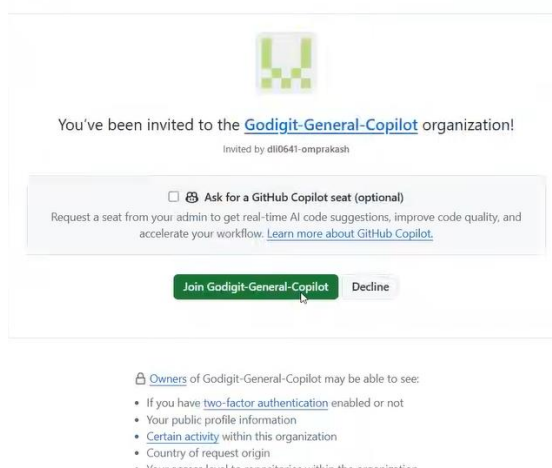

- You will receive an invitation to join **Godigit-General-Copilot**.

- Click the invitation link to join.
- If you already have a Copilot account, sign in. Otherwise, create a new account.

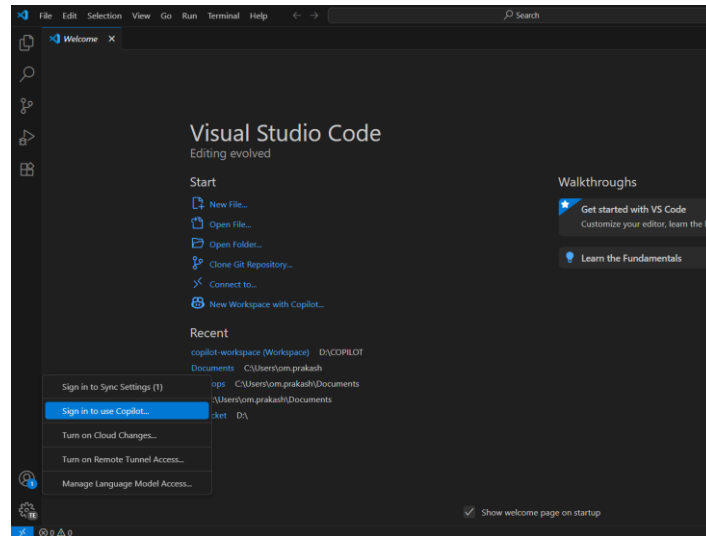

- When creating your account, use the username format: **EmpId-Name**.
- After creating your account, confirm your email address and sign in.
- Go back to the invitation email and click the link again to join **Godigit-General-Copilot**.

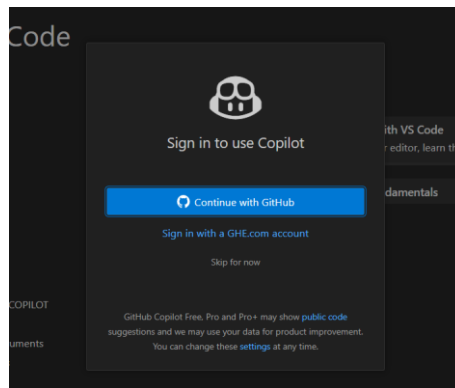

- Accept the invitation to complete the process.

2. Using Copilot in VS Code

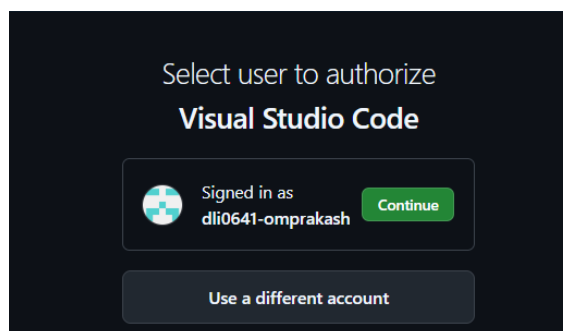

- Open VS Code and click **Sign in to use Copilot.**

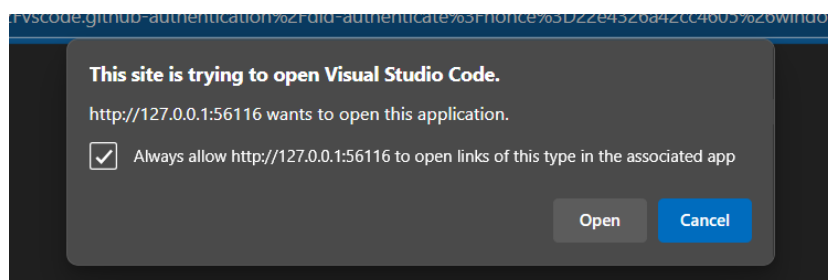

- Click **Continue with GitHub.**

- Sign in with your Copilot account.

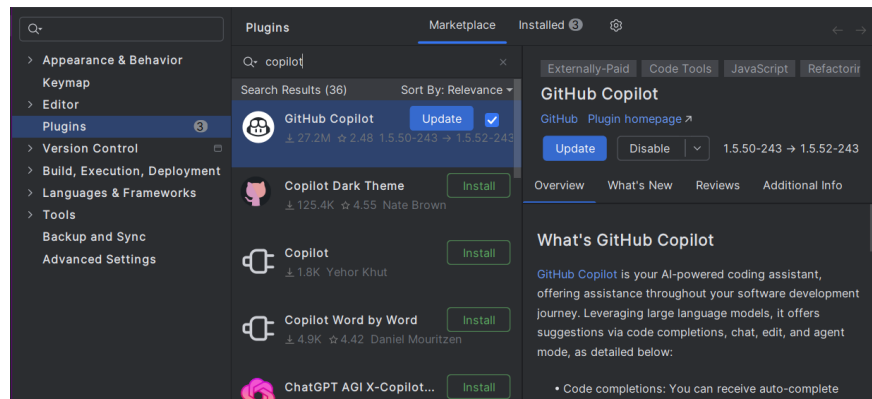

- Click **Open** when prompted.

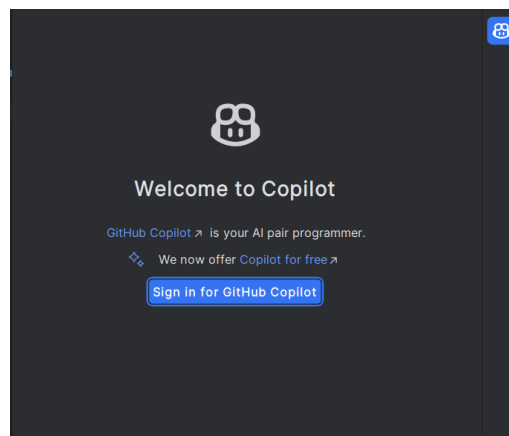

3. Using Copilot in IntelliJ

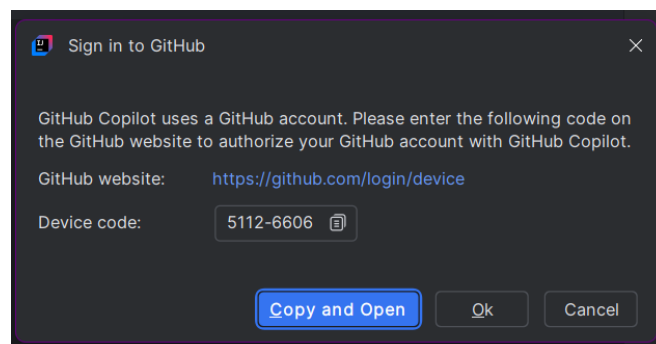

- Go to **Settings** → **Plugins**.
- Install the **Copilot** extension.

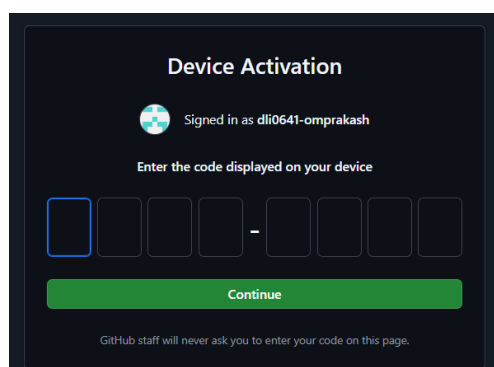

- Sign in to Copilot.

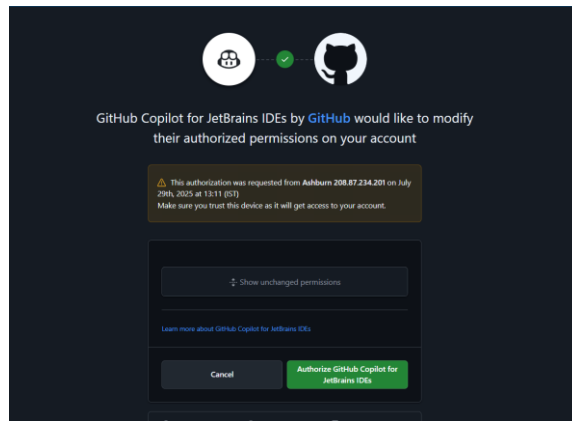

- Click **Copy & Open** when prompted.

- Enter the copied code and continue.

- Click **Authorize**.

After completing these steps, you can use Copilot.
